Specification of GLL-CLRC-9W/12W/15W

Introduction

Globe LED lighting Inc designed the LED ceiling mount retrofit kit specialized for offices, corridors and staircases. It uses good quality LEDs and electronic technology. It is bright enough to do any daily tasks, whilst also saving electricity when not in use. The magnetic design makes it is very easy to install, and perform maintenance on.

Features:

Easy Installation (magnet used) – The retrofit kit is designed for retrofitting on ceiling mounted circular light fixtures. The magnet on the light easily attaches to the metal base of the fixture.

Repairable & Modular Design - 70% of the retrofit kit cost are from the LED chips, and they rarely have any defections. However, the adapter of this kit is where most of the problems occur. The modularized design makes it very affordable and easy to replace as GLL has designed the LED kit to simplify repairs, rather than changing the entire light.

High Illumination - Luminous Flux: 123 lumens / W

Long Lifetime – Lifetime is longer than 5 years

Specification:

Power: 9W/12W/15W

Drive Input Voltage: AC110-277

Drive Output Voltage: DC27V-42V

LED Input Voltage: 36VDC

DC Current: 240mA(9W) / 350mA(12W) / 420mA(15W)

Color Temperature: W (3000K-3500K), N (4000K-4500K), C (5000K-6000K)

Luminous Flux: 123 lumens / W

CRI: > 75

Lifespan: > 50,000 Hours

CSA Certified

Energy Star Certified
